

To whom it may concern - I am strongly opposed to the proposal to allow ILECs to exclude CLECs and IXC's from their telecom systems. Locally, SBC has been an absolutely horrible service provider with long downtimes and unknowledgable and rude service representatives...all characteristics of entrenched monopolies. It was not until service access was provided to CLECs and IXC's that I finally got decent DSL service and a friendly response if problems came up. Please continue to allow me to have access to the DSL service provider of my choice. Thank you
